## JOHN COOPER WORKS AERODYNAMIC KIT.

The aerodynamic kit is a sophisticated piece of engineering that visually reflects the John Cooper Works sporting heritage.

Featuring a black ventilation grille and fog lights trimmed with black fins, the front apron underlines the car's dynamism. The bold lines of the chunky side skirts end in racing-style air intakes. The side skirts come in body colour, while the wheel arches are available in either black or body colour. An imposing rear apron, featuring black fins above the rear fog lights, completes the aerodynamic kit.

Air filter<sup>3</sup>

The tuning kit boosts the output of the twin-scroll turbocharger in a MINI Cooper S with manual transmission to an incredible 200 HP (147kW), with maximum torque of 250 Nm between 1,750 and 5,000 rpm. With the overboost function, 270 Nm can be achieved between 1,800 and 5,000 rpm for a short period – enough to take the MINI Cooper S from 0 to 100 km/h in just 6.8 seconds, and on to a maximum speed of 234 km/h. The sports exhaust, is not just a visual highlight, it also gives a throatier engine note. A specially developed air filter system which improves power delivery completes the kit. The engine management software has been reconfigured so as to squeeze every last drop of power out of your MINI, ensuring it delivers invigorating acceleration right across the rev range.

Performance figures relate to the Cooper S model from 03/10 production. For information on earlier Cooper S models, please contact your local MINI Dealer.

When adding extra style to your MINI Hatch why stop with the exterior? Bring the inside of your MINI to life with a whole host of interior styling accessories. With top quality materials, special interior trims and creative storage solutions, your MINI Hatch has never been such a stylish place to be!
